OUR TOWN IS STRONGER ECONOMICALLY BECAUSE OF U.S. SAVINGS BONDS

Take a look around our town! Don't you see all the signs of a strong economy? How about that mechanic down the street who just opened his own garage, the neighbor who's sending his son through medical school? How about all those homes that are being started and those bright new cars that are parked in front of our town's bustling stores? Things look pretty healthy, don't they?

Do you ever stop to wonder how much of this prosperity was made possible by U. S. Savings Bonds? Not just because they helped our country through an emergency either. Although that's part of it.

An even more encouraging fact is that all over America more people are saving more money, purposefully, than ever before in the history of the world. Today, more than

40,000,000 Americans own more than \$41,000,000,000 of cash savings—in U. S. Savings Bonds! They're one of the world's safest, surest investments. Your Government guarantees the principal of U. S. Series E Savings Bonds—up to any amount—and the rate of interest you receive.

Payroll Savings is the easiest way to save!

One of the reasons so many people are reaching their savings goals with Bonds is the Payroll Savings Plan. It's a sure-fire way to steady savings because the money is saved for you automatically.

You just sign the authorization card in the payroll department where you work. Sign up for any amount you wish—a couple of dollars a payday or as much as you can spare. And when enough has accumulated, it's automatically invested in a Series E Savings Bond in your name and the Bond is turned over to you.

Then your savings really go to work—building up a backing of security for you and your family. And adding to the economic well-being of our town and our country! If you haven't already signed up for the Payroll Savings Plan, why not do it today?

U. S. SAVINGS BONDS STRENGTHEN THE SECURITY OF YOUR FAMILY, YOUR COMMUNITY, YOUR COUNTRY

Science Outwits Mothers of Lambs

AUBURN—Odor experts stepped in to confuse the maternal instincts of mother sheep, and thereby save the lives of neglected lambs.
Frequently, says API Extension Animal Husbandryman Bob Farquhar, ewes that give birth to twins will neglect the first-born and give all their attention to the second arrival. One sheepman who noticed this maternal misbehavior thought of an unusual way to prevent it.

He took a spray can of air freshener, the type that destroys odors, and sprayed it on the neglected lamb. Then he rubbed some of the mother's nose. She immediately gave equal attention to both of her children.
Subsequent trials showed that the trick also works in getting a ewe whose lamb has died to mother or orphan or a neglected twin. In this case, one of the twins is sprayed and given over to the lambless mother, who promptly accepts it.

SOIL CONSERVATION NEWS

By T. C. Self and Joe Wildman, S.C.S.

"More Water." Each year during the dry hot months most of us suffer from lack of water. The water is needed for crops, livestock and an ever increasing population. According to recent news, stories many cities and towns in Alabama have used more water than ever before.

J. S. Daniels, who lives on the New Hope river road, recently called on Soil Conservation personnel for assistance in getting a cheap source of good clean water. A hill side seepage area was investigated as a possibility for a seep.

Little Man... Big Problem

THE CHURCH FOR ALL... ALL FOR THE CHURCH

The Church is the greatest factor on earth for the building of character and good citizenship. It is a storehouse of spiritual values. Without a strong Church, neither democracy nor civilization can survive. There are four sound reasons why every person should attend services regularly and support the Church. They are: (1) For his own sake. (2) For his children's sake. (3) For the sake of his community and nation. (4) For the sake of the Church itself, which needs his moral and material support. Plan to go to church regularly and read your Bible daily.

Buddy was going to the circus today, but he woke up with the sniffles this morning and the whole thing had to be called off!

While grown-ups learn to shrug off disappointments like that, it isn't easy for a child. Buddy's mother will soon come to the rescue with a special taffy pull or a favorite story-reading session, and that will help cushion the blow.

But there will be times when Buddy will have to stand up to far greater tests than this, and when he will have to take far greater disappointments in stride. That's one of the reasons his mother has started taking him to Church and Church School. It isn't that the Church serves as a cushion in times of stress... rather, it stands as a pillar of strength, lending support to all who come within it.

DRIVE STARTED TO PUBLICIZE STATE PEANUTS

Alabama's 18,000 peanut growers have entered the second phase of a permanent promotional drive by approving a broad trade and consumer publicity campaign based on the results of a recently completed national market research survey.

H. H. Knowles, Headland, President of the Farm Bureau Producers Association, said emphasis would be placed on telling the Alabama story to peanut buyers throughout the nation and increasing the sales of processors who are the major purchasers of runner peanuts from this state.

Approval by the Association directors of the new educational and promotional program followed a conference between growers, food merchandising experts and guest advisors from food chains and the peanut butter candy and related industries on effective steps to be taken this year and in 1959 to increase the market for Alabama peanuts.

In its report on "The Peanut Market: Problems and Possibilities," the public relations firm (Farley Manning Associates) making the market survey urged growers to publicize in every possible way the flavor of Alabama peanuts; foster sales of peanut butter, scale purchases in this area, since 85.5 per cent of all "runners" go into peanut butter, pioneer new markets in the candy and salted peanut industries, sponsor efforts toward improved quality, explore new transportation techniques and methods of reducing freight charges, work with manufacturers to develop new methods of packaging and merchandising, and new products.

Knowles expressed the hope

MORE FORESTS DIE OF DISEASE THAN FROM FIRE

AUBURN — Plant diseases reduce the productivity of our forests more than any other agent, including fire.

API Extension Forester Ike Martin says that a recent study published by the Forest Service of the U. S. Department of Agriculture showed that 43 per cent, almost half, of the combined growth of mortality losses are due to tree diseases.

Most diseases affecting American forest trees are native, according to Martin. These occasionally rise to epidemic proportions, for a variety of reasons. Some diseases, white pine blister rust and chestnut, for example, have been introduced from other continents.

Though insect damage is the greatest single cause of tree mortality, when growth losses and mortality are added together, only half as much destruction is caused by insects as by disease. Fire damage is about as extensive as insect damage.

Tremendous work in forest fire prevention and control has reduced the harm caused by this menace, but of course, any relaxation in effort could make it once again the number one destroyer.

"We can expect further reduction in losses from all causes," said Martin.

that since the national survey showed that marketing problems of Alabama and Georgia growers are in a great measure the same, growers of the two states will be able to work closely "to make the Southeast the dominant factor in the edible nut trade." Representatives of the Georgia Farm Bureau, which is sponsoring a program similar to Alabama's, attended the Alabama conference, the Association President said.

Through the Keyhole

BY MRS. ROBERT CANNON

MR. AND MRS. CLAUDE EUGENE DORSEY III

The marriage of Miss Dixie Lee Hayes, daughter of the Rev. and Mrs. Richard Lee Hayes of Milledgeville, Ga., to Mr. Claude Eugene Dorsey III, son of Mrs. Claude Dorsey Jr., and the late Mr. Dorsey of Elba, was solemnized at the First Baptist Church in New Brockton on Saturday, May 31st, at five in the afternoon.

The bride was given in marriage by her father, who also officiated at the ceremony. He was assisted by the Rev. Murray Seay.

A background of greenery was formed against the Baptists and choir rail by the use of pine foliage and magnolia leaves. Around the base of the platform were massed palms while white candles in tall, slender holders added a note of quietness. White candles burned in standard baskets holding Easter lilies, gladioli and carnations were tied with white satin bows. Window tickets held dainty candies and ribbon arrangements.

A program of nuptial music was presented by Miss Linda Jones of New Brockton. The traditional wedding marches were used. Mr. Russell Baxley of Enterprise sang "Because" and "I Love Thee," before the ceremony.

The bride was lovely in a gown of Chantilly lace over silk tulle, fashioned with a fitted bodice re-embroidered in iridescent, pearls and sequins and long lace sleeves. The lace of the bodice extended into panels reaching to the front and back while the bouffant sides were formed by ruffles of pleated tulle. The neckline of the dress was completed by a string of pearls which had been given to Dixie by the groom.

DRIVE STARTED TO PUBLICIZE STATE PEANUTS

Alabama's 18,000 peanut growers have entered the second phase of a permanent promotional drive by approving a broad trade and consumer publicity campaign based on the results of a recently completed national market research survey.

H. H. Knowles, Headland, President of the Farm Bureau Producers Association, said emphasis would be placed on telling the Alabama story to peanut buyers throughout the nation and increasing the sales of processors who are the major purchasers of runner peanuts from this state.

Approval by the Association directors of the new educational and promotional program followed a conference between growers, food merchandising experts and guest advisors from food chains and the peanut butter candy and related industries on effective steps to be taken this year and in 1959 to increase the market for Alabama peanuts.

In its report on "The Peanut Market: Problems and Possibilities," the public relations firm (Farley Manning Associates) making the market survey urged growers to publicize in every possible way the flavor of Alabama peanuts; foster sales of peanut butter, scale purchases in this area, since 85.5 per cent of all "runners" go into peanut butter, pioneer new markets in the candy and salted peanut industries, sponsor efforts toward improved quality, explore new transportation techniques and methods of reducing freight charges, work with manufacturers to develop new methods of packaging and merchandising, and new products.

Knowles expressed the hope

MORE FORESTS DIE OF DISEASE THAN FROM FIRE

AUBURN — Plant diseases reduce the productivity of our forests more than any other agent, including fire.

API Extension Forester Ike Martin says that a recent study published by the Forest Service of the U. S. Department of Agriculture showed that 43 per cent, almost half, of the combined growth of mortality losses are due to tree diseases.

Most diseases affecting American forest trees are native, according to Martin. These occasionally rise to epidemic proportions, for a variety of reasons. Some diseases, white pine blister rust and chestnut, for example, have been introduced from other continents.

Though insect damage is the greatest single cause of tree mortality, when growth losses and mortality are added together, only half as much destruction is caused by insects as by disease. Fire damage is about as extensive as insect damage.

Tremendous work in forest fire prevention and control has reduced the harm caused by this menace, but of course, any relaxation in effort could make it once again the number one destroyer.

"We can expect further reduction in losses from all causes," said Martin.

that since the national survey showed that marketing problems of Alabama and Georgia growers are in a great measure the same, growers of the two states will be able to work closely "to make the Southeast the dominant factor in the edible nut trade." Representatives of the Georgia Farm Bureau, which is sponsoring a program similar to Alabama's, attended the Alabama conference, the Association President said.

Through the Keyhole

BY MRS. ROBERT CANNON

MR. AND MRS. CLAUDE EUGENE DORSEY III

The marriage of Miss Dixie Lee Hayes, daughter of the Rev. and Mrs. Richard Lee Hayes of Milledgeville, Ga., to Mr. Claude Eugene Dorsey III, son of Mrs. Claude Dorsey Jr., and the late Mr. Dorsey of Elba, was solemnized at the First Baptist Church in New Brockton on Saturday, May 31st, at five in the afternoon.

The bride was given in marriage by her father, who also officiated at the ceremony. He was assisted by the Rev. Murray Seay.

A background of greenery was formed against the Baptists and choir rail by the use of pine foliage and magnolia leaves. Around the base of the platform were massed palms while white candles in tall, slender holders added a note of quietness. White candles burned in standard baskets holding Easter lilies, gladioli and carnations were tied with white satin bows. Window tickets held dainty candies and ribbon arrangements.

A program of nuptial music was presented by Miss Linda Jones of New Brockton. The traditional wedding marches were used. Mr. Russell Baxley of Enterprise sang "Because" and "I Love Thee," before the ceremony.

The bride was lovely in a gown of Chantilly lace over silk tulle, fashioned with a fitted bodice re-embroidered in iridescent, pearls and sequins and long lace sleeves. The lace of the bodice extended into panels reaching to the front and back while the bouffant sides were formed by ruffles of pleated tulle. The neckline of the dress was completed by a string of pearls which had been given to Dixie by the groom.

PEACE POWER

What it is...
How you can achieve it...

Peace Power is the strength to keep the peace, of course, but that's not all.
Peace Power is also children.
Because the child who today stands tiptoe, discovering the world, may tomorrow discover new wonders of science and outer space for all of us. If he has peace to grow in.
But peace costs money. Money for strength to keep the peace. Money for science and education to help make peace lasting. And money saved by individuals. Your Savings Bonds, as a direct investment in your country, make you a Partner in strengthening America's Peace Power.
Think it over. Are you buying as many as you might?

Beirut Cabarets Sparkle With Joyful Night Life
If one is content to remain in Beirut itself, he will find plenty of cabarets and night life in the teeming Zetouny district. Or he can enjoy din-ner and classical and popular music by an orchestra on a hotel terrace or roof-garden, usually his table in full view of the mountains bejewelled with the lights of tiny vil-lages.
Restaurants and cafes in Beirut are numerous and vary in their cuisine from Arabic to French, Italian, Greek and American. Most of them are fashionable, with in-door din-ing in the winter, and out-doors in summer, and a band at all seasons. Terrace dining is popular in summer, and most of the hotels have roof restaurants. Bars are plentiful and well-stocked and night-clubs offer imported floor-shows and stimulating music.

Spray When You See Signs of Insects

The latest generation of in-sect pests is rapidly finding its way into juicy vegetable gar-dens and tender flower beds.
The best way to control these troublemakers, says API Exten-sion Entomologist Jerry Ruffin is to be on the watch for their arrival and to have in hand a dust gun containing Auburn-approved garden dust (rate-none) or five percent malath-ion.

Aphids, cutworms, and vege-table weevils are among the pests most likely to bother you.
Mil dew spots can be removed from fabric by wetting it in cold water and rubbing in salt. Place the garment in the sun and wet often. Repeat until the garment is clear.

Honey can be used measure for measure instead of sugar in puddings, custards, pie fill-ings, baked apples and other fruits, and sweet-sour vegeta-bles.

A spoonful of olive oil added to an open jar of dill pickles or olives will eliminate the white film that often forms.
